DERMA LAYR™

How to use

DermaLayr exists to deliver pure efficacy.

DermaLayr enables rapid delivery of multiple active ingredients deep into the dermal layers of the skin.

Step 1

Dampen your skin.

DermaLayr active film will absorb upon contact with damp skin.

Step 2

Remove protective backing.

Be careful not to touch the exposed active film with wet fingers.

Step 3

Apply the active film firmly to your skin.

You should see and feel it absorbing immediately.

Step 4

Mist the application area.

If needed, mist the application area further with water or toner to ensure full absorption.

Step 5

Wait 5 seconds.

We recommended waiting at least 5 seconds for the active film to fully absorb.

Step 6

Peel away.

DermaLayr active film has now delivered active ingredients deep into the skin's dermis, where they really work.
